

Kroka Expeditions ~ Summer 2021 Pre-Arrival Protocol

In order to maintain a safe and resilient community at Kroka, families coming to Kroka must comply with the following protocol during the 7 days leading up to your arrival. Recognizing that definitions and guidelines vary state by state, we are outlining our own expectations below. ***The health of the entire Kroka community depends on your commitment!***

DURING THE WEEK PRIOR TO YOUR ARRIVAL:

1. Wash your hands regularly with soap and water and maintain high standards of hygiene
2. **Limit public exposure outside the home** and maintain safe distance from others when leaving home
3. **Wear a mask at all times when in stores and public places** and practice social distancing
4. If knowingly exposed to the virus or if you experience any symptoms, self-isolate and get tested
5. If a member of your household contracts COVID-19 within two weeks prior to your arrival, **DO NOT COME TO KROKA!** We will be happy to work out an alternate program or a refund

5-7 DAYS BEFORE ARRIVAL: get a COVID-19 PCR test. Once test results come back negative, upload them to your student portal. ***You must have proof of a negative PCR test uploaded before you arrive at Kroka!***

48 HOURS PRIOR TO ARRIVAL: fill out a Covid Risk Interview (CRI) form on your parent portal. ***You must complete and submit this form before coming to Kroka!***

WHEN TRAVELING TO KROKA: Follow CDC guidelines when traveling to Kroka. Guidelines change frequently. Refer to this page for the current guidance: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

VACCINATIONS: We encourage your family to get vaccinated against COVID-19 before the summer if possible. However, we will not have a fully vaccinated summer community and therefore the above protocol applies to all students, regardless of vaccination status.

Thank you for your help to keep the Kroka community safe and virus-free this summer!
